Getting you started...

MERLIN HOSTS OVER 70 REPORTS - These business critical reports cover all areas of the system:

- Sales Order Processing
- Stock Control
- Purchase Order Processing
- Contact Management (CRM)
- Financials
- Production Control

Point and click means you can quickly and easily run reports on given criteria, with numerous options to display, print and export the results.

MERLIN MANAGEMENT REPORTING SUITE - Over 130 additional customer driven reports are also available - written with Crystal Reports, these give you the

flexibility to amend them to best suite your business requirements.

Bespoke Reporting

INDUSTRY STANDARD - Merlin harnesses the capabilities of Crystal Reports, enabling you to produce reports on all data held within your Merlin system.

Embed your bespoke reports to your Merlin menu and only permit users access to the reports they need to see or you're happy for them to see.

CREATE AND SHARE YOUR OWN REPORTS

- With our comprehensive training you can empower all or particular members of your team to create and schedule specific, fundamental reports and share them with relevant staff and departments.

DON'T HAVE THE TIME OR RESOURCE?

- Our experienced Training and Implementation team are available to write reports to your specification for an additional fee.

Running and Scheduling Reports

Reports can be run repeatedly with automatically refreshed data for up-to-the-minute results, with the ability to schedule and run key reports at specific times and/ or for specific users.

The Dashboard

Top level business intelligence for key performance indicators are also available within the Merlin Dashboard for an at-a-glance, personalised view of your business performance - for more information see the fact sheet.
